SYSTEM ARCHITECTURE

- 3 tier architecture
    - Client - in browser front end
        - Dynamic layout using jQuery
        - Responsive Site so it works with mobile devices - done with a mixture of CSS and JS
    - Server
        - Carries out calls to Celebrity photo source - (TBD)
        - Communicates with Database for authentication and URL generation
    - Database
        - Holds records of users, statistics and photo locations
